WATER CONSERVATION POLICY

OBJECTIVE

The institution has designed the water conservation policy to achieve following objectives:

- To create awareness amongst students and staff members to prevent wastage of water.
- To have a system to store and use rainwater.
- To educate housekeeping staff on reuse of water.

THE POLICIES

1. Awareness to students and staff members :
 - a. The Nature's Club should organize events on the importance of water conservation.
 - b. Nature's Club has to put posters to educate the stakeholders to prevent the wastage of water.
2. Rain water harvesting :
 - a. The institution has installed the rain water harvesting system in the open area of the institution.
 - b. The rain water collected should be filtered and collected in the borewell.
 - c. The borewell should have a water distribution system for specific use of stored water.
3. Water Reuse by housekeeping :
 - a. The non-contaminated (detergent free) water should be used for watering plants and other cleaning purposes.
 - b. The excess water of the garden should be stored in a borewell after filtering for reuse.

Hence, the institution aspires to effectively minimize water wastage and its optimum utilization by conserving, filtering and reusing water by implementing the water conservation policy.
